EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nathan Prepelka on 5/17/2005 & 5/18/2005.

The application has been amended as follows:

Claim 11 has been replaced with:

--

A mid-mount mower having a mower unit disposed between front wheels and rear wheels, comprising:

a body frame supported above the ground by said front wheels and rear wheels, said body frame having a front cross frame in a forward portion thereof with respect to a longitudinal direction of a vehicle body, said front cross frame suspending said front wheels;

a main jack body mounted on the front cross frame to be pivotable about a pivot shaft extending longitudinally of the vehicle body, said main jack body being in a storage position extending along said front cross frame when pivoted to a first pivot position about said pivot shaft, and in a substantially vertical position relative to the ground with

Art Unit: 3671

one end of said main jack body contacting the ground when pivoted to a second pivot position about the pivot shaft; and

a brake pedal disposed in a forward portion of the body frame to be movable between a braking position and a non-braking position; and a lock device for holding the brake pedal in said braking position; wherein said brake pedal in said non-braking position blocks operation of said control device engaged with said controlled portion of the main jack body in said vertical position relative to the ground;

wherein when an operating force is applied to a controlled portion of the main jack body in said vertical position relative to the ground, said main jack body is extendable and contractible to raise and lower said front cross frame while maintaining said front cross frame in a substantially parallel posture relative to the ground.

--

Claim 15 has been cancelled.

Claim 16 has been replaced with:

--

A mid-mount mower as defined in claim 11, wherein said lock device is formed as a lock pedal, said brake pedal and said lock pedal being arranged side by side around a central area of said cross frame.

--

claim 17 has been replaced with:

--

A mid-mount mower as defined in claim 11 further comprising a link member interlocked to movement of said brake pedal, said link member blocking operation of said control device engaged with said controlled portion of the main jack body in said vertical position relative to the ground, when said brake pedal is in the non-braking position.
